SAFETY MANAGEMENT

Safety is our top priority.

We have no tolerance for any practice that does not promote safety at work. We have worked hard at developing a safety culture.

Our goal is tough: we want to eliminate all accidents from project site workplaces. Our positive approach to safety has enabled us to grow. Our commitment to safety is an important part of our vision. We consider safety as no accident. We constantly work at it with hands-on training. Proactive safety management keeps our job site injury-free.

Safety Record

Thanks to the efforts of our safety conscious employees, we hold the best safety

Management Commitment to Safety

We are committed to maintaining a safe and healthful working

Environment.

We pledge our best efforts to work together safely to achieve this goal. We regularly communicate our goal to all employees.

OUR COMMITMENT

To act as problem-solvers and innovators that assist senior decision-makers to realize their corporate objectives.

To deliver outstanding value, to exceed expectations and to build long-term business relationships.

We bring the managerial and technical experience needed to collaborate with your team from problem definition to solution implementation.

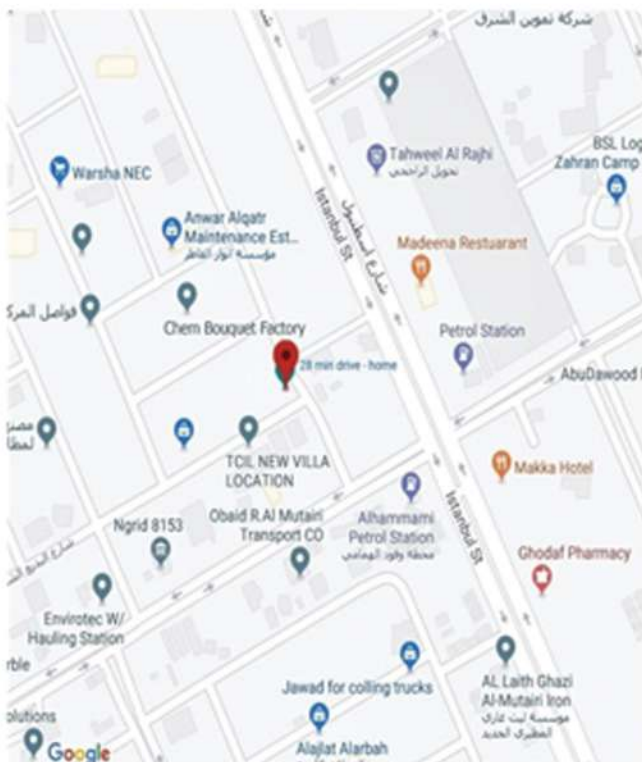

QUALITY ASSURANCE SYSTEM

Quality assurance system may be visualized as a series of inter-related controls which are exercised to achieve the desired quality Objectives.

They are:-

- PROCESS CONTROL-Drawing & Technical Specification, Construction Methodology, Quality Assurance Plan, Resource based planning etc.
- PROCUREMENT CONTROL-Vendor evaluation & Registration, Specification for Work order, Qualification of Procured items .
- MATERIALS CONTROL-Material receipt, QA/QC verification, Storage, on conforming material segregation storage, Issue of materials, Stores Register
- INSPECTION & TEST CONTROL-Quality Assurance Plan, Calibration of measuring Equipment's, Inspection Records, Statistical Analysis.
- NON-CONFORMANCE CONTROL-Preventive & Corrective Action.
- DESIGN CONTROL-Basic Design, Process Design
- DOCUMENT CONTROL-Controlled copy, Distribution, Old copy Disposition.
- RECORD CONTROL-Document identification, Storage ,Retrieval, Maintenance, Permanent & Temporary records.
- TRAINING CONTROL-In-House Training, Institutional Training.
- QUALITY SYSTEM AUDIT-Audit by Internal Quality Auditors
